DETAILED ACTION

This Office Action is in response to applicant's amendments filed on July 28, 2003. The rejections of this application have been withdrawn due to a restriction requirement (the examiner should have raised the issue of restriction and the examiner takes this opportunity to correct her position by raising the issue of restriction). Claims 1-39 are presented for examination.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.

- I. Claims 1-10, 21-29, and 36-39 drawn to a network usage system having multiple level distributed data storage system comprising first and second level network data collectors that processes and stores network accounting data, classified in class 709, subclasses 223, 224.

- II. Claims 11-20 and 30-35 drawn to a network usage system having multiple level distributed data storage system comprising first and second network data collectors including first, second, and third encapsulators and aggregators for processing and storing data, classified in class 709, subclass 201.

2. The inventions are distinct, each from one another because of the following reasons: Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

they are shown to be separately usable. In the instant case, invention I has separate utility such as in a data storage system comprising first and second network data collectors including first, second, and third encapsulators and aggregators for processing and storing data (as set forth in invention II). See MPEP § 806.05(d)

3. The inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N Burgess whose telephone number is (703) 305-3366. The examiner can normally be reached on M-F (8:00am-4:00pm).
